

Touchy Storm Slab Avalanches in Hyalite

Hyalite - main fork

Northern Gallatin

1/24/2025

Code

SS-R1-D1-S

Latitude

45.44720

Longitude

-110.96200

Notes

Very touchy storm slabs formed throughout the day. 6-8" deep by 3pm. low density snow/[slab](#) but very fast moving. We were able to [trigger](#) steep (35+) rolls with chunks of ice and even got one to go with a falling rope. We saw one natural (d1) that ran ~200' down a gully near mummy 2.

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

R size

1

D size

1

Bed Surface

S - Avalanche released within new snow

Problem Type

New Snow

Slab Thickness

7.0 inches
